Migration

```
2021_10_04_124339_create_clientes_table.php - projeto - Visual Studio Code

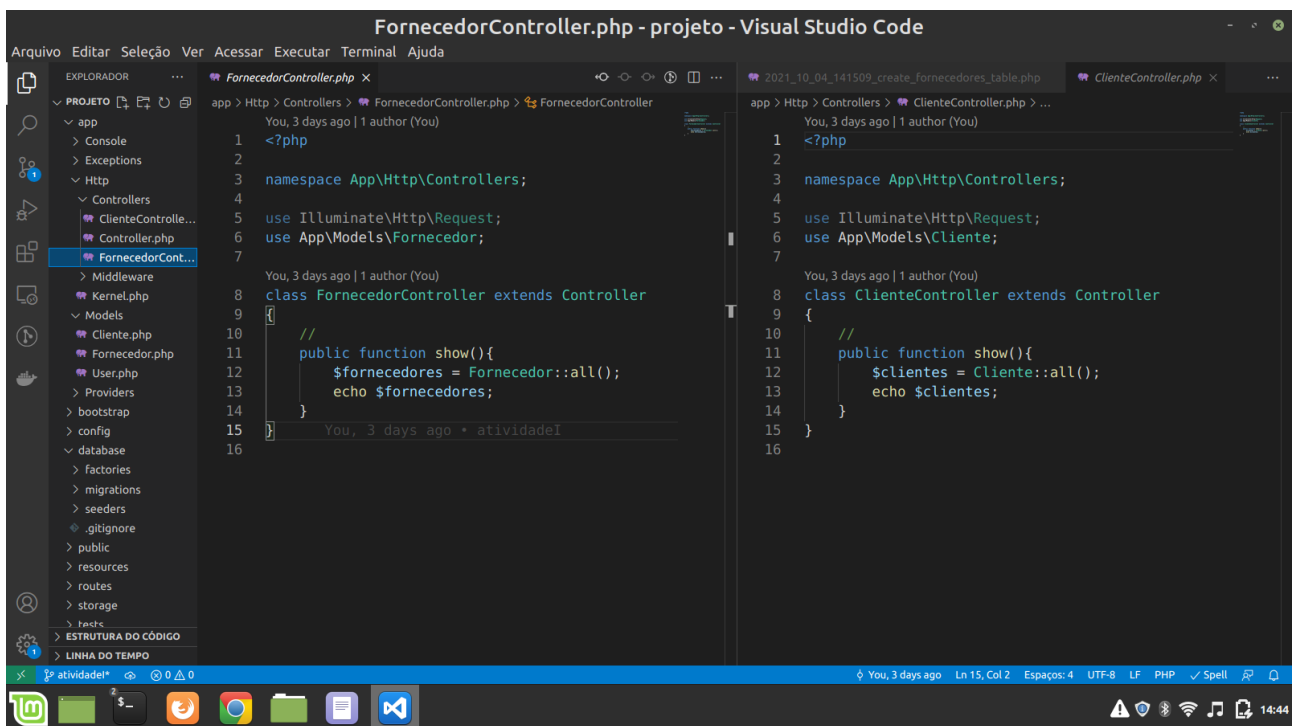

class CreateFornecedoresTable extends Migration
{
    /**
     * Run the migrations.
     * @return void
     */
    public function up()
    {
        Schema::create('fornecedores', function (Blueprint $table) {
            $table->id();
            $table->timestamps();
            $table->string('nome', 60);
            $table->string('cnnpj', 18);
            $table->string('email', 60);
        });
    }

    /**
     * Reverse the migrations.
     * @return void
     */
    public function down()
    {
        Schema::dropIfExists('fornecedores');
    }
}

class CreateClientesTable extends Migration
{
    /**
     * Run the migrations.
     * @return void
     */
    public function up()
    {
        Schema::create('clientes', function (Blueprint $table) {
            $table->id();
            $table->timestamps();
            $table->string('nome', 60);
            $table->string('endereco', 60);
            $table->float('debito');
        });
    }

    /**
     * Reverse the migrations.
     * @return void
     */
    public function down()
    {
        Schema::dropIfExists('clientes');
    }
}
```

Controller

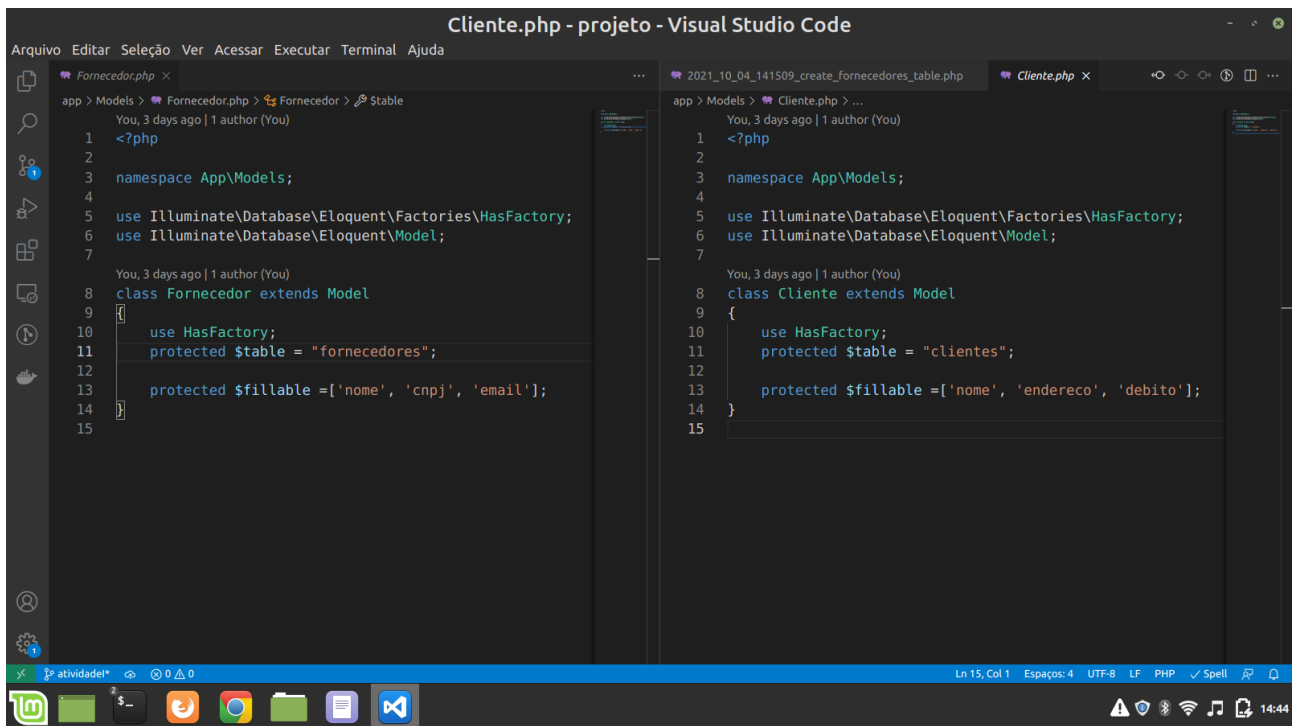

```
FornecedorController.php - projeto - Visual Studio Code

class FornecedorController extends Controller
{
    //
    public function show(){
        $fornecedores = Fornecedor::all();
        echo $fornecedores;
    }
}

class ClienteController extends Controller
{
    //
    public function show(){
        $clientes = Cliente::all();
        echo $clientes;
    }
}
```
